

Tether USD Bridged ZED20 (USDT.z) White Paper

1. Executive Summary

USDT.z is a **stable, community-driven token**. Designed for **simplicity, accessibility, and transparency**.

Total Supply: **27,000,000,000 USDT.z** | Decimals: **18**

Purpose: To provide a **stable and reliable token** for community use with Trust Wallet or other BEP20-compatible wallets.

2. Introduction

Many tokens require users to manage wallets and blockchain interactions. USDT.z aims to simplify the process, making it easy for anyone to access token information and utility.

Mission: Create a **user-friendly and community-first token**.

3. Problem & Solution

Problem:

- Complexity in managing wallets and blockchain can discourage users.
- Many stablecoins require technical setup, limiting adoption.

Solution:

- USDT.z requires a **Trust Wallet or BEP20-compatible wallet** for access.
- All token information is transparent and accessible via the official website.
- Community-driven tokenomics ensure stability and trust.

4. Tokenomics
